

Standard Maintenance Requirements

- These requirements are for Hyundai vehicles operating under normal usage conditions.
- Hyundai vehicles operating under severe operating conditions will require more frequent inspections and maintenance intervals and replacement items, see page 2 for more details.

Petrol Turbo Hybrid Vehicles¹

Gasoline Direct Injection (GDI) Hybrid Models

- o Tucson (NX4) HEV (all variants) Model Year 2025 onwards
- o Santa Fe (MX5) HEV Model Year 2025 onwards

Maintenance Intervals every 10,000km or 12-months (whichever occurs first)

I = INSPECT, **C**LEAN & **R**EPLACE AS NECESSARY
R = REPLACE, **S** = SAVE, **C** = CLEAN, **L** = LUBRICATE
T = TIGHTEN TO SPECIFIED TORQUE

¹ This Standard Maintenance Requirements Excludes Petrol (MPI) Hybrid & Petrol Models.

Core Service	Engine oil and engine oil Filter	R	Core Service	Torque wheels	T
	Interior cabin / Pollen filter	I		Body and under body/chassis condition	T
	Engine air filter	I		Engine drive belts condition	I
	Brake pedal and parking brake/EPB operation	I		Condition & security of accessories, towbar etc	I
	Brake fluid level	I		Differential oil (front and/or rear as applicable)	I
	Engine coolant level	I		Transfer fluid (if applicable)	I
	Air conditioning system operation	I		Exhaust system & mountings	I
	Electrical equipment operation (lights, wipers etc)	I		Campaign/recalls/nav map update (if available)	I
	12-Volt Battery condition & test	I		eReport – Hyundai diagnostic tool (GDS-SMART)	I
	Cooling and heater system hoses	I		Road Test	
	Tyre (x4) condition and pressures	I	ADD-ONS		
	Spare tyre condition & pressure &/or repair kit	I	H1	Interior Cabin / Pollen Filter	R
	Wheel bearing condition	I	H2	Brake Fluid Replacement	R
	Front and rear brake pads & disc condition	I	H3	Engine Air Filter	R
	Driveline system, incl CV Boots	I	H4	Fuel Filter	R
	Fuel tank, fuel lines and connections	I	H5	Spark Plugs	R
	Front and rear suspension components	I	H6	Coolant (Engine & Inverter)	R
	Front suspension ball joints & dust covers condition	I	H7	Wheel Alignment	when required I
	Steering system, linkages, rack, rubber boots	I	H8	Tyre Rotation & Balance	when required I
	Transmission (Auto, CVT, DCT) visual leak inspection	I	H9	A/C Service (R134a Type)	when required I
	High-voltage battery system	I	H10	Hybrid Starter Generator Belt	R
	Brake pipes & hoses condition	I			

Standard Maintenance Intervals	Age (Yrs)	KMs Travelled	Hyundai Recommended Maintenance Items Replacement Intervals			
	(By Vehicle Age or Km's Travelled, WHICHEVER OCCURS FIRST)		Intervals will change for severe operating conditions			
	1	10,000	Core Service			
	2	20,000	Core Service			
	3	30,000	Core Service	+ H1	+ H2	+ H3
	4	40,000	Core Service			+ H10
	5	50,000	Core Service			
	6	60,000	Core Service	+ H1	+ H2	+ H3
	7	70,000	Core Service			+ H5
	8	80,000	Core Service			+ H10
	9	90,000	Core Service	+ H1	+ H2	+ H3
	10	100,000	Core Service			+ H6
	11	110,000	Core Service			
	12	120,000	Core Service	+ H1	+ H2	+ H3

Interval Details :

- "Core Service" is required at each interval and includes replacement items and inspections as per the requirements above.
- Add-on item "H1, H2 & H3" - Replace every 30,000km or 24-months (whichever comes first) as per the manufacturer's maintenance schedule. Customer pays capped menu price, which includes genuine parts, labour, and GST.
- Add-on item "H4" for these models is considered a maintenance free item.
- Add-on item "H5" - Replace every 70,000km or 84-months (whichever comes first) as per the manufacturer's maintenance schedule. Customer pays capped menu price, which includes genuine parts, labour, and GST.
- Add-on item "H6" - Replace every 100,000km or 120-months (whichever comes first) as per the manufacturer's maintenance schedule. Customer pays capped menu price, which includes genuine parts, labour, and GST.
- Add-on items "H7 ~ H9" are inspected at each interval. Dealer will provide the necessary customer recommendations. Customer to pay for replacement items and Technician labour as per capped menu pricing.
- Add-on items "H10" - Replace every 40,000km or 48-months (whichever comes first) as per the manufacturer's maintenance schedule. Customer pays capped menu price, which includes genuine parts, labour, and GST.

Severe Operating Maintenance Requirements – Petrol Turbo (HEV)

Hyundai vehicles operating under severe operating conditions will require more frequent inspections and maintenance intervals and replacement items. Generally the maintenance intervals for severe operating conditions are half of the standard maintenance intervals (eg: [standard] every 10,000km or 12-months → [severe] 5,000km or 6-months)

Severe Operating Conditions

- a) **Repeated short distance driving less than 8km in summer or less than 16km in winter.**
 - Engine oil and oil filter: reduced replacement interval.
- b) **Extensive engine idling**
 - Engine oil and oil filter: reduced replacement interval.
- c) **Driving in dusty areas**
 - Engine oil and oil filter: reduced replacement interval.
 - Air filter: more frequent inspections and replacement intervals - if required.
 - Interior cabin / Pollen filter : more frequent inspections and replacement intervals - if required.
 - Brake discs & pads : more frequent inspections.
 - Brake fluid: more frequent inspections for signs of contamination.
- d) **Driving in areas using salt or other corrosive materials or in very wintry weather.**
 - Engine oil and oil filter: reduced replacement interval.
 - Brake discs & pads : more frequent inspections.
 - Brake fluid: more frequent inspections for signs of contamination.
 - Underbody & associated components : more frequent inspections for signs of corrosion.
- e) **Driving in sandy areas**
 - Engine oil and oil filter: reduced replacement interval.
 - Air filter: more frequent inspections and replacement intervals - if required.
 - Interior cabin / Pollen filter : Inspect more frequently and replacement intervals - if required.
 - Brake discs & pads : more frequent inspections.
 - Brake fluid: more frequent inspections for signs of contamination.
- f) **More than 50% driving in heavy traffic during hot weather**
 - Engine oil and oil filter: reduced replacement interval.
 - Transmission oil : Inspect more frequently and replacement intervals - if required.
- g) **Driving in mountainous areas**
 - Engine oil and oil filter: reduced replacement interval.
 - Transmission oil : Inspect more frequently and replacement intervals - if required.
 - Brake discs & pads : more frequent inspections.
- h) **Towing a trailer at max towing capacity (if applicable)**
 - Engine oil and oil filter: reduced replacement interval.
 - Transmission oil : Inspect more frequently and replacement intervals - if required.
 - Brake discs & pads : more frequent inspections.
